# OUR HISTORY

**1903**

Nathan Rothenberg immigrates to New York City and establishes a used clothing business out of his horse and buggy.

**2005**

Safety Zone introduces its first Shoemobile® a safety footwear retail outlet on wheels that visits customers throughout the island.

**1935**

Nathan's oldest son, Morris Rothenberg, relocates operations to Great Jones Street, NYC. The company expands into selling military surplus (wholesale), and other dry goods products.

**1950**

Morris' son, Marvin Rothenberg, moves to San Juan, Puerto Rico & establishes New York Wiping Products Co., a light manufacturer of wiping materials.

**2000**

Morris Rothenberg establishes Safety Zone, a division of New York Wiping & Industrial Products Co., and opens its first Safety Zone retail store in Guaynabo, Puerto Rico.

**2002**

Safety Zone expands to its second retail location in Caguas, Puerto Rico.

**1956**

Marvin relocates the company to a new 22,000 sq. ft. building on Barbosa Avenue, Hato Rey, Puerto Rico.

**1992**

Years after Marvin's oldest son, Morris Rothenberg, joined the company, he relocates it to a new, 36,000 sq ft building in Amelia Distribution Center, Guaynabo, Puerto Rico.

**1996**

The company expands its product line to include work footwear and personal protective equipment (PPE) and is renamed as New York Wiping & Industrial Products Company.

## 2021

Safety Zone is acquired by Aramsco, Inc., a multi-national distributor and manufacturer. This broadens the services and products offered by Safety Zone.

**AramSCO**  
A FAMILY OF COMPANIES

## 2008

Safety Zone grows to include two more storefronts in Vega Baja and Ponce, Puerto Rico. By this time, the company controls 4 retail locations.

## 2009

Safety Zone acquires two more Shoemobiles® from its competitor Iron Age, increasing its fleet to four trucks.

**LEHIGH**  
safety shoes®

## 2010

Safety Zone acquires its competitor Lehigh Safety Footwear and becomes Puerto Rico's leading safety footwear distributor.

**3M**

## 2020

Safety Zone is appointed a 3M retail distributor & continues its expansion of Personal Protection Equipment (PPE).

## 2013

Safety Zone is appointed Protective Industrial Products (PIP) distributor and expands its product line of personal protective equipment (PPE).

## 2019

Safety Zone introduces Dickies Work apparel to the marketplace and expands its offering of personal protective equipment (PPE).

# MEASURES & SIZES

## MEN'S WEAR

The following guidelines are important in measuring for proper fit.

- Give all measurements in inches.
- If the person's measurements are between sizes, order the larger size.

**For example:** if a man's neck measures 15¾" you should order size large in a short sleeve shirt or a 16-16½" in a long sleeve shirt.

- For greatest accuracy, have someone take measurements rather than allowing customers to measure themselves.
- The tape measure should be pulled snug, not tight.
- Check the size scale of all garments being ordered to ensure that all measurements were taken at the proper points.

### MEN'S SHIRTS

- **NECK:** Measurement is the circumference of the neck as illustrated.
- **SLEEVE LENGTH:** Measured by placing one end of the tape at bottom of the collar at the center of the back and marking the distance around the elbow to bottom of the wrist. It is often helpful to have the arm slightly bent.
- **CHEST:** Taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. Hold tape level and firmly but not tight.

### MEN'S TROUSERS, JEANS AND BIB OVERALLS

- **WAIST:** Measurement is taken at the top of the hipbone over shirt (not over pants). Tape should be held snug not tight.
- **INSEAM:** Measurement taken from base of the crotch to top of the shoe or boot. For jeans, add 1".
- It is advisable to ask the person being measured how he or she wears their trousers. Not everyone wears their trousers or jeans the same length or height on their hips.

### JACKETS

- **CHEST SIZE:** Taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. Measurement should be taken over clothing, preferably over same garment or types of garments to be worn with the jacket.
- **SLEEVE LENGTH:** Measured by placing one end of the tape at the bottom of the collar at the center of the back and marking the distance around the elbow to the outer edge of the wrist.

## WOMEN'S WEAR

- **CHEST:** Measurement is taken at the fullest point of the bust. Measure across shoulder blades with arms relaxed down at sides, keeping tape parallel to the floor. Hold tape level and firmly but not tight.
- **WAIST:** Measurement is taken around the natural waistline. Keep the measuring tape comfortably loose.
- **HIP:** Measurement is taken by standing with heels together. Keep tape straight and parallel to the floor, measure around the fullest part.

# WOMEN'S FOOTWEAR

# FOOTWEAR STANDARDS

## Impact Requirement

ASTM - Class 75 (I) footwear for men shall demonstrate a minimum interior height clearance of 12.7 mm (0.50 in.) during impact exposure to 101.7 J (75 ft-lbf). Applies to steel, aluminum and composite protective caps. Class 75 footwear for women shall demonstrate a minimum interior height clearance and 11.9 mm (0.468 in.) during impact exposure of 101.7 J (75 ft-lbf). Applies to steel, aluminum and composite protective caps.

## Compression Requirement

ASTM - Class 75 (C) footwear for men shall demonstrate a minimum interior height clearance of 12.7 mm (0.50 in.) during exposure to a compressive force of 11,121 newtons (2500 lbf). Applies to steel, aluminum and composite protective caps. Class 75 footwear for women shall demonstrate a minimum interior height clearance of 11.9 mm (0.468 in.) during exposure to a compressive force of 11,121 newtons (2500 lbf). Applies to steel, aluminum and composite protective caps.

## Metatarsal Requirement

ASTM - Metatarsal (Mt) protective footwear must first meet the Class 75 requirements for impact and compression resistant footwear. The height of the wax form used to measure metatarsal protection of men's footwear shall be a minimum of 25.4 mm (1.0 inch) after exposure of impact energy of 101.7 J (75 ft-lbf). For women's metatarsal protection there shall be a minimum of 23.8 mm (0.937 in.) after exposure of impact energy of 101.7 J (75 ft-lbf).

## Puncture Resistance Requirement

ASTM - Puncture Resistant (PR) insole must withstand a puncture force of 270 lbs., will not crack after 1.5 million flexes and show no signs of corrosion when exposed to a 5% salt solution for 24 hours.

## Electric Shock Resistance Requirement

ASTM - Electric Shock Resistant (EH) footwear must withstand the application of 18,000 volts at 60 Hz for 1 minute with no current flow or leakage in excess of 1.0 milliamperes under dry conditions.

## Static Dissipative Requirement

ASTM - Static dissipative (SD) footwear shall reduce the accumulation of excess static electricity while maintaining a level of electrical resistance between 106 ohms (1 megohm) and 108 ohms (100 megohms).

## Conductive Protection Requirement

ASTM - Conductive (CD) footwear shall dissipate static electricity from the body to reduce the possibility of ignition of volatile compounds. Electrical resistance must range between 0 to 500,000 ohms.

## Other Requirements

ASTM - ASTM safety footwear must be tested by a third party laboratory. The footwear does not need to be retested unless the standard is revised or the platform construction changes.

## ALL SAFETY FOOTWEAR MEET:

- ASTM F2413-18
- I/75
- C/75 STANDARDS

Made of lightweight aluminum which is about 30 to 50 percent lighter than steel. Toe boxes provide the same level of safety as steel but a bit more room since its thinner.

Safety footwear with composite safety toes are non-metallic and undetectable in electronic security environments. Safety Footwear is rated ASTM F2413-18 I/75 C/75

Steel Toe footwear exceeds both ASTM F2413-18 I/75 & C/75 standards, the highest for impact & compression.

Waterproof safety footwear will keep the wet out. With waterproof leathers, sealed seams and many with bootie construction that will help in keeping moisture out.

Puncture resistant footwear meets ASTM PR standards for puncture resistant.

Heat resistant outsoles prevent charring and cracking and provide foot protection for brief periods of direct contact that meet or exceed 500F.

Water resistant footwear will keep your feet dry.

Static Dissipating safety footwear meets the ASTM SD standard of 1-100 megohms to protect against the hazards of static buildup in the workplace.

Safety footwear with electrical hazard is rated ASTM F2413-18 EH and protect the wearer against open circuits.

Slip Resistant soles are outsoles designed with slip resistant compounds which are tested to reduce the risk of slips and falls in the workplace area.

Soft toe boots still may have other features such as, Electrical Hazard or Static Dissipation ratings and puncture plates in the sole.

### Visit Policy for SZ Shoe Mobile retail outlet:

All deliveries for Safety footwear under 25 pairs will incur a freight surcharge of \$50.00 per visit. Footwear sales above this minimum are exempt from this surcharge. In order to avoid this penalty you can purchase safety footwear from any of our four Safety Zone retail stores located around the island or via next day delivery service.

**Claims & Returns:** No returns will be accepted without our authorization. All claims must be made within 10 days of receipt of order. Defective merchandise must be returned within 10 days of receipt of order. We cannot accept return goods that have been soiled in any way or contain price stickers, tags or markings. Other returns will be subject to a 15% restocking charge. Any return of merchandise not ours will be returned freight collect.

### Company Guarantee Policy and Return of Merchandise (for Safety Shoes)

**1. 90 day Guarantee** - If a manufacturer defect occurs during the first 90 days after the purchase date, the company will replace the item or provide the customer a credit for the total amount of the purchase price. This credit can only be applied to the purchase of a new pair of safety shoes. There are no cash refunds. Credit for defective shoes are valid for 30 days.

**2.** All returns must be accompanied by a store receipt and/or sales invoice in order to honor the guarantee.

**3.** No credit will be allowed for shoes with excessive wear and tear or improper use (i.e. ruptures, chemical or acid damage).

**4.** The only boots we guarantee against water are those models that are listed in the manufacturer's catalog as "waterproof".

### Company Guarantee Policy and Return of Merchandise (excluding Safety Shoes)

**1.** Safety Zone will not accept returns or changes of merchandise correctly delivered. Please verify the merchandise before leaving the store.

**2.** All claims with manufacturing defects or merchandise incorrectly dispatched must be done within 5 labor days. After this period, all returns and/or changes will not be accepted.

**3.** There are no cash refunds. A credit will be issued, valid for one month. The credit must be redeemed for merchandise in the store.
